Introduction

Ces quelques mots d'introduction devraient logiquement être écrits en anglais quand on voit que plus de 90% de la recherche et de l'information publiées aujourd'hui sur le Rwanda le sont en anglais. Mais la Francophonie mérite de perdurer, même concernant un pays devenu largement anglophone.

Comme les précédentes, cette bibliographie liste les publications matérielles et électroniques parues pendant l'année 2017, en anglais et en français (sauf rares exceptions), portant en tout ou en partie, mais en partie conséquente, sur le Rwanda.

Elle est organisée thématiquement, malgré les problèmes que cela implique. Les sous-classes (les sections) sont regroupées en classes (les chapitres) qui pourront paraître aléatoires. On est quelquefois obligé de classer telle entrée ou telle sous-classe par défaut ou faute de mieux. L'important reste que toutes les entrées soient listées.

Le problème principal est le suivant: le bibliographe recueille et classe toutes les entrées pertinentes qu'il trouve dans des bases de données qui sont massivement anglophones (Ebsco, Proquest, Muse, Sage, Web of Science, Wiley, Worldcat, Taylor & Francis, Oxford, Cambridge, De Gruyter, Gale, Hein, DOAJ, DOAB, BMC, PubMed, MedLine, AJOL, ERIC, MLA, *etc.*) et, à un bien moindre degré, francophones (OpenEdition, Cairn, Persée, Érudit ou Thèses.fr). Il recense ainsi les travaux scientifiques ou universitaires, pas mal de littérature grise, les œuvres littéraires ou paralittéraires et quelques publications électroniques qui, agrégés, font l'essentiel de la bibliographie. On trouvera ici les grands livres incontournables comme les petits articles sans valeur qui ont l'honneur d'être listés dans les bases de données.

Mais ces bases ne référencent pas, sauf très rare exception, les articles des grands quotidiens qu'on trouvera dans LexisNexis ou ceux des grandes revues (e.g. *The Economist*). Or beaucoup de ces articles de presse sont aujourd'hui plus intéressants que certains travaux publiés dans des revues dites scientifiques ou que les "livres" publiés par les éditeurs sans scrupule de Saarbrücken, par exemple. Un étudiant de maîtrise fortuné peut publier sa thèse et la voir mentionner dans Worldcat, de même qu'un auteur "self published" de CreateSpace (Amazon) son roman, alors que de bons reportages ou d'importants éditoriaux du *Guardian*, du *New York Times* ou du *Monde*, pour ne citer que quelques journaux, n'y figureront jamais. Si une bibliographie est un portail permettant au minimum d'accéder aux publications sérieuses, alors la bibliographie universitaire traditionnelle ne joue plus son rôle. Cette bibliographie traditionnelle listera par exemple l'article sur le mal de dos des employés de telle banque rwandaise (cf. 2.4) ou les élucubrations d'un plumitif anti-Kagame ou anti-France mais pas le remarquable reportage du *Guardian* sur la récente interdiction d'importer des vêtements d'occasion au Rwanda (cf. 2.1). Sans parler des articles du *New Times* (Kigali) qui, bien qu'idéologiquement grevés, peuvent beaucoup apprendre, ou de ceux de *Jeune Afrique*. La même chose peut être dite à propos de certains blogs et sites internet: d'intéressants "papers" peuvent à l'occasion y être publiés qui ne sont pas pour autant recensés dans les bases de données.

Il faudrait donc inclure ces articles de presse, et d'abord les "long reads", qui informent si bien. La bibliographie idéale listerait les travaux des spécialistes *et* les articles des journalistes d'investigation. Mais cela représente un travail humainement impossible (LexisNexis liste 343 entrées "Rwanda" pour la seule dernière semaine de 2017) et dangereusement subjectif. Car il faut trier, et qui jugera que le mal de dos des employés de banque ou les communiqués d'une petite ONG importent moins que l'opinion d'un journaliste économique du *Wall Street Journal*?

La bibliographie a des limites, alors même que son sujet paraît illimité, et seule une poignée d'articles de presse et de blogs sont ici listés.

Enfin, on notera les choses suivantes:

Les têtes de chapitre et de section sont en anglais parce que le matériau est pratiquement tout en anglais.

Les livres sont signalés par un fond gris pour les distinguer des articles et des chapitres, y compris les “livres” vendus par les éditeurs de Saarbrücken ou par CreateSpace.

Sont listés les travaux publiés en ligne par SSRN (Social Science Research Network) et par The University of Rwanda (Cf. 12.3). Malheureusement, le site internet du Repository of the University of Rwanda ne fonctionne pas bien et tous les travaux postés cette année n’ont pu être recensés.

C’est dans les catégories *Histoire*, *Témoignage* et *Littérature* qu’on trouve principalement les publications francophones.

La démangeaison de publier excite particulièrement les centaines de spécialistes de la santé publique, tous anglophones sauf pour deux ou trois d’entre eux.

La sous-classification des chapitres “Public Health” et “Natural Sciences” ne prétend pas être scientifique.

Comme auparavant, le chapitre “Society” s’avère être un peu le fourre-tout de la bibliographie.

La Nuit Rwandaise n’a pas paru en 2017; et, sauf erreur, *L’Afrique des grands lacs: Annuaire 2016-2017* n’a pas encore paru au 31 décembre 2017.

On a recensé les “book reviews” mais il est avéré que cette section est incomplète, tout comme celles des thèses et des mémoires.

Plus que jamais, il faudrait un bibliographe sachant le kinyarwanda. Et aussi bien l’allemand, le néerlandais et bien d’autres langues.

Certains articles électroniques n’ont pas de numéro de volume ou de pagination; on indique alors leur DOI.
